

SOUTHWEST MAINTENANCE GROUP

Motor PMs
Equipment Inspections
On-site Balancing

Vibration Analysis
Precision Alignments
Outage Support

Major equipment rebuilds, predictive maintenance, and emergency service repairs are a major cost and have a large impact on a company's bottom line.

The actual cost of a major plant outage is typically dominated by the cost of the business interruption caused by the outage and subsequent equipment startup.

Since **1947**, Casey has been perfecting the art of shutdowns and plant maintenance support services. Casey's Southwest Maintenance Group is dedicated to providing innovative solutions to complex issues. The Southwest Maintenance group is familiar with the rigors of shutdowns and is sensitive to the specific needs of working in an operating facility.

The Casey maintenance team focuses on minimizing project duration while optimizing the client's overall project outcome – all while maintaining steadfast commitments to safety and quality.

Southwest Maintenance Group

At Casey, we have a passion for customer service. From Laser alignment to Vibration Analysis, from new construction to maintenance support, our goal is to serve your electro-mechanical needs. Our experienced craftspeople and local management, coupled with the infrastructure and capability of a large proven contractor make us a valuable part of any maintenance strategy.

Over the years, we have overcome the challenges of working on major industrial jobs in semi-remote locations around the United States. Many of our projects are on an emergency basis and have challenging timelines in critical industries.

Allow Casey to “Bring Value through Innovation” to your next project.
